The dairy checkoff program was created by dairy farmers to increase demand & help sell the 18 BILLION POUNDS OF SURPLUS MILK that existed in 1983.

Since the dairy checkoff began in 1984, dairy consumption has grown by 73 POUNDS PER PERSON & dairy farmers have experienced an annual growth in milk’s commercial disappearance.

WHO WE ARE

Dairy farmers pay 15 cents and dairy importers pay 7.5 cents for every hundred pounds of milk they sell or import into a generic dairy product promotion fund – familiarly called the “dairy checkoff” – that Dairy Management, Inc. manages along with state and regional promotion groups, like the American Dairy Association Mideast. That money – with USDA oversight – is used to fund programs aimed at promoting dairy consumption and protecting the good image of dairy farmers, dairy products and the dairy community.
